About the Waterfront Regeneration Trust

The Waterfront Regeneration Trust Corporation is a not for profit charitable organization that brings people, ideas and resources together for the revitalization of waterfronts and watersheds.

Working with communities around Lake Ontario, the Niagara River, the US and abroad, the Trust links environmental, social and economic actions to create solutions that have multiple and long term benefits. Our core programs are the Lake Ontario Waterfront Trail, Toronto & Region Remedial Action Plan, Brownfield Redevelopment and Waterfront Heritage.

Website: www.waterfronttrust.com

Waterfront Regeneration Trust

Ten years have passed since the release of **Watershed**, the interim report of the Royal Commission on the Future of the Toronto Waterfront. What have we learned from our collective experience since then? What are the lessons and tools that can guide us in the next decade?

A Decade of Regeneration is about our special relationship with Lake Ontario, and the remarkable progress that is being made by thousands of people dedicated to the Lake Ontario Greenway. The book brings attention to waterfront excellence and celebrates waterfront heritage as a reflection of buildings & culture, ideas & tradition, and of the connections between people and nature.

With a myriad of examples, **A Decade of Regeneration** documents initiatives large and small where trails have added measurable value, where creative partnerships and funding have resolved an apparent gridlock, and where excellence in design has elevated a typical project into a piece of art and heritage. **A Decade of Regeneration** sets a new direction for the next decade of regeneration to capture the momentum and renew our commitments.
